

MINNESOTA: Canada Lynx & Owls

Sunday 25th February - Tuesday 6th March 2018

7 Wise Birding Clients

Leaders: Chris Townend / Andy Stanbury, Clinton Nienhaus & local guide

HIGHLIGHTS OF TRIP

Canada Lynx: Exceptional views of at least 3 different animals with over 6 hours of viewing! - See checklist.

Bobcat: An unexpected sighting near Cotton as we left Sax Zim Bog. An animal crossed the road in front of us all and disappeared into the woodland.

Great Grey Owl: Two birds this year. One en route from Thunder Bay to Grand Marais and the other gave exceptional views at Sax Zim Bog as it caught a vole just metres from us. Quite incredible views!

Boreal Owl: Certainly a good owl year and great to see this bird near Sax Zim Bog as it sat perched in a tree close to the road giving great scope views.

Northern Flying Squirrel: Great views again this year with two animals seen at Gunflint Lodge bird feeders by torchlight.

Moose: Three animals on the Gunflint Trail on evening was a welcome sight particularly after the recent decline in numbers in the region.

The undoubted highlight of the tour was seeing at least 3 different Canada Lynx for a number of hours! (Photo by Andy Stanbury)

SUMMARY

The Superior National Forest in Minnesota has long been known as an area with a good population of Canada Lynx (sometimes referred to as Canadian Lynx). However, actually seeing the "Ghost of the Forest" is a big challenge and one that needs perseverance! This tour had a clear focus to maximise time in the field at a time of year when the Lynx mating season has just started, males regularly patrol territories and animals can be very vocal.

This was the third year in a row that Wise Birding Holidays have been running tours to see Canada Lynx in Minnesota and like the previous two tours it was successful. However, it is fair to say that <u>this tour was exceptional</u> for the number of sightings and the length of time spent watching Lynx!

In addition to Lynx, we saw another 10 mammals including Bobcat, Moose, American Marten, Stoat and Northern Flying Squirrel. Fisher was also recorded but sadly only on our trail camera!

The tour also coincided with a good owl year and we were very lucky to see four species of owl. Great Grey Owl and Snowy Owl are always targets species but Northern Hawk Owl and Boreal Owl are less predictable. Other bird highlights included Harlequin Duck, Bufflehead, Bald Eagle, three species of grouse, Black-backed Woodpecker, Pine Grosbeak and Evening Grosbeak!

This year we were also lucky with the weather as we hit it just right with slightly warmer temperatures allowing us to be out in the field for longer periods of time. The success of this tour certainly benefited from what had been learned from the 2016 and 2017 Wise Birding Tours to Minnesota (Trip Reports <u>HERE</u>). More importantly, the invaluable assistance and expert knowledge from our local guide is always crucial to success.

Sunday 25th February: Arrival

Most of the group arrived into the quiet airport at Thunder Bay on an early evening flight from Toronto followed by a very short transfer to our hotel.

Monday 26th February: Thunder Bay to Grand Marais

Daytime temp. +2 to -7 degrees C

A short journey time of around 90 minutes to Grand Marais with a surprise Great Grey Owl en route thanks to Colleen. Lunch at Grand Marais and a quick check of the harbour before meeting the rest of the group at our comfortable accommodation on the shores of Lake Superior.

We spent the afternoon with our local guide David who led us around the back roads of the Gunflint Trail and the Superior National Forest.

Tuesday 27th February: Gunflint Trail

Daytime temp. +5 to -7 degrees C

The whole day was spent around the Gunflint Trail. The clear highlight were two different Canada Lynx sightings, including an animal for over 2 hours! See checklist notes. Birds included Red-breasted Nuthatch, Black-capped Chickadee, Grey and Blue Jays and Ruffed Grouse for some of the group.

Wednesday 28th February: Gunflint Trail

Daytime temp. +3 to -11 degrees C

Another full day around the Gunflint Trail and associated back roads. Birds included Red-breasted Nuthatch, Black-capped Chickadee, Grey Jay, Blue Jay, Pileated Woodpecker, Downy Woodpecker and Spruce Grouse. No Lynx today but a brief American Marten was the mammal highlight.

Thursday 1st March: Gunflint Trail

Daytime temp. -6 to 0 degrees C

Full day around the Gunflint Trail and associated back roads. An incredible three different Lynx sightings today, including an animal watched for over 3 hours! See checklist notes. A visit to the Gunflint Lodge during the early evening produced the hoped for Northern Flying Squirrel and three Moose en route were a real bonus.

Friday 2nd March: Gunflint Trail

Daytime temp. -19 to +1 degrees C

An early visit to Gunflint Lodge and a much colder morning! Pine Grosbeaks, Common Redpoll and Arctic Redpoll were the bird highlights. Two separate Lynx sightings were the clear mammal highlight - See checklist notes. A Stoat was also new for the mammal trip list.

Saturday 3rd March: Gunflint Trail - Duluth

Daytime temp. -6 to +2 degrees C

An early morning check of the usual roads produced a couple of brief Lynx sightings - See checklist notes. A Ruffed Grouse was flushed from the road.

We then headed SW along Lake Superior to Duluth where we met our local bird guide Clinton. Highlights during the afternoon were a female Harlequin Duck at Two Harbours and a grand finale of no less than four Snowy Owls!

Sunday 4th March: Sax Zim Bog - Duluth - Grand Marais

Daytime temp. +1 to 0 degrees C

A full day exploring Sax Zim Bog produced some exceptional birding. Highlights included a Great Grey Owl catching a vole just metres from us, Northern Hawk Owl, Boreal Owl, Rough-legged Buzzard, Black-backed Woodpecker, a small group of "dancing" Sharp-tailed grouse and a flock of Evening Grosbeak! The clear mammal highlight was a Bobcat strolling across the road in front of us and a Common Muskrat narrowly avoiding the talons of a Great Grey Owl!

Monday 5th March: Gunflint Trail

Daytime temp. -6 to -2 degrees C

A final day exploring the Gunflint Trail on our first windy day of the tour. No new birds and no Lynx, but a Grey Fox was a surprise find after lunch whilst on the Gunflint Trail road.

Tuesday 6th March: Grand Marais - Thunder Bay

Daytime temp. -2 to +2 degrees C

A visit to Grand Marais harbour and some of the garden feeders produced a number of new birds for the trip. Highlights included Bufflehead, Red-bellied Woodpecker, Dark-eyed Junco and a Common Grackle.

We then took the short journey to Thunder Bay where the tour ended.

Conservation Donation: Following this tour to Minnesota a donation of £180 (\$250) was donated to Sax Zim Bog Acres for Owls Project. This is a Land Preservation Project which go directly to bog land purchase within the Sax-Zim Bog Important Bird Area (IBA). The mix of spongy peat land and spruce forest that make up the Sax-Zim

Bog in northern Minnesota is one of the most important birding sites in North America.You can find out more about Sax Zim Bog on the following link: www.saxzim.org

MINNESOTA: Wise Birding Holidays Bird and Mammal Checklist for 25th Feb - 6th March 2018 This bird checklist follows the nomenclature and classification from HBW and BirdLife International Illustrated Checklist of the Birds of the World and the associated online resource HBW Alive.

#	Common Name	Scientific Name	#	Species Notes
1	Ruffed Grouse	Bonasa umbellus		Two birds were seen on backroads on the 27th
2	Spruce Grouse	Falcipennis canadensis	2	A cracking male posed in the sunshine on a lov
3	Sharp-tailed Grouse	Tympanuchus phasianellus	-	Great to see a group of 7 birds at Sax Zim Bog
4		Branta canadensis	4	Two birds were present in Grand Marais harbou possibly an intermediate.
5	Long-tailed Duck	Clangula hyemalis	5	A small group passed Grand Marais harbour wa
6	Bufflehead	Bucephala albeola	6	A female/immature bird was seen in the harbo
7	Common Goldeneye	Bucephala clangula	7	Small groups recorded on three days. Twice in
8	Red-breasted Merganser	Mergus serrator	8	A single bird along the shore of Lake Superior
9	Harlequin Duck	Histrionicus histrionicus	9	Great to see this uncommon and highly sought
10	Mallard	Anas platyrhynchos	10	A couple of birds seen along the shore of Lake
11	Rock Dove	Columba livia	11	Recorded around Duluth on the 3rd March.
12	Arctic Herring Gull	Larus smithsonianus	12	The commonest gull species recorded on three
13	Northern Hawk-owl	Surnia ulula	13	Great to see perched and in flight around the S
14	Boreal Owl	Aegolius funereus		Excellent scope views of a perched bird on the
15	Great Grey Owl	Strix nebulosa	15	We were also treated to incredible views at Sax
	Snowy Owl	Bubo scandiacus	16	A total of four different birds seen around Dulu wing-tagged. Green tags with white numbers 4
	Northern Goshawk	Accipiter gentilis		A single bird was seen on the 4th March whilst
	Bald Eagle	Haliaeetus leucocephalus		Some great views with birds recorded on the 2
	Red-tailed Hawk	Buteo jamaicensis		A single bird seen near Thunder Bay on the 26
	Rough-legged Buzzard	Buteo lagopus		Nice views of a soaring bird around the Sax Zir
	Pileated Woodpecker	Hylatomus pileatus		Seen in flight whilst patrolling for Lynx on the 2
	Red-bellied Woodpecker	Melanerpes carolinus		A surprise find at Grand Marais on our last mor
	Black-backed Woodpecker			Superb views of a male searching for food amo
	Downy Woodpecker	Dryobates pubescens		Recorded on the 28th Feb and 4th March. Best
	Hairy Woodpecker Peregrine Falcon	<i>Leuconotopicus villosus Falco peregrinus</i>		Recorded on three days during the tour with sind A single bird seen whilst travelling to Duluth or
	Black-capped Chickadee	Poecile atricapillus		A very common species recorded daily.
	Red-breasted Nuthatch	Sitta canadensis		A very common species recorded daily.
29	Northern Grey Shrike	Lanius borealis		considered a full species under HBW taxonomy
	Blue Jay	Cyanocitta cristata		A very common but nonetheless beautiful spec
	Grey Jay	Perisoreus canadensis		A speciality of the region and seen very well. R
	Black-billed Magpie	Pica hudsonia		A single bird seen whilst travelling around the
-	American Crow	Corvus brachyrhynchos		Small numbers recorded on three days with sig
	Common Raven	Corvus corax		Counts of 1-3 birds on three days with sighting
	Common Starling	Sturnus vulgaris		This introduced species was recorded around D
	Common Redpoll	Carduelis flammea		Small groups on three days around the Gunflin
3/	Arctic Redpoll	Carduelis hornemanni		A single bird in a flock of around 20+ Common
38	Pine Grosbeak	Pinicola enucleator	38	Smaller numbers this year but great views of n single male at Mary Lou's feeders at Sax Zim B
	Red Crossbill	Loxia curvirostra	39	March. Also heard only on the 26th Feb.
	Evening Grosbeak	Hesperiphona vespertina		Excellent views of males and females at Mary L
	Dark-eyed Junco	Junco hyemalis		A single bird around Grand Marais bird feeders
42	Common Grackle	Quiscalus quiscula	42	Another surprise find in Grand Marais on our la
